

Calculus 3.4c Warm-up – 10/23/15

- 1) Calculate y' given $x^2y - 2xy = y^2$
- 2) Calculate the equation of the normal line to $x^2y - 2xy = y^2$ at $(-1,3)$

Assignment 3.4c

Pg. 53 # 15-25

Agenda

- Warm-up
- 3.4c notes – Implicit Differentiation
