

Economic Benefit vs. Environmental Cost Material

You and your partner will be assigned a natural resource and either environmental cost or economic benefit. You will create a poster based on what you are assigned.

If you are assigned environmental cost your poster will be a protest of the use of this natural resource. What is the cost to our environment?

If you are assigned economic benefit your poster will be an advertisement for this natural resource? How does it support our economy?

You will present your poster and your findings to the class. Remember, there is another group opposing your poster so support your arguments with evidence and reason. FIND THE DATA!

Partner 1: _____

Partner 2: _____
